

K.E. EAGLE REMOTE HEAD

The **KE Eagle Remote Head** is specifically designed for people who need a full featured remote head at a reasonable price.

The Eagle is aimed primarily at the sports coverage market where the speed and manoeuvrability of a light weight head is essential.

The production market is also catered for, with the Eagle easily able to carry camera up to and including "RED".

The state of the art digital control system provides the Eagle with super smooth, accurate and responsive operation.

The Eagle is designed primarily for use with the *K.E. Carbon Fibre camera crane*, but will easily mount onto any crane with a standard Moy or Mitchell mount.

The Eagle can also easily be mounted in a fixed location with the use of a simple bracket. Cable runs of over 50 m are possible.

PERFORMANCE and DESIGN FEATURES
